

“Very helpful, providing us with critical insight into our challenges and urban solutions...”

ENDORSEMENTS

“Over the last eight years, Professor Steffen Lehmann has shown outstanding leadership in advising our organisation and the City of Helsinki and the Helsinki Metropolitan Region concerning future urban development. Steffen has an international and well-established reputation as leader in Green Urbanism and we have invited him several times to contribute to our urban strategies and give seminars. His work and visits to Helsinki have not only made a significant contribution to the field of sustainable urban development, but has shaped and continues to shape our thinking about the future of our metropolitan region.”

-- Irma Karjalainen, Director, Helsinki Region Environmental Services Authority

“The Lab is an urban strategy powerhouse that always meets our very high expectations...”

“The research of Steffen Lehmann’s Lab can be best described as at the forefront in the development of new perspectives on the urban transformation potential of neighbourhoods in becoming more sustainable, resilient and socially inclusive. His work and publications enjoy high international standing within the research community, and he is internationally recognized as a thought leader in sustainable architecture and cities.”

-- Dr Igor Peraza, Professor of Practice, American University of Sharjah, UAE

“The Leadership Lab helps us to think differently...”

“We have been working with Steffen Lehmann on urbanisation, development and environmental issues in the Asia-Pacific region since January 2012. He has been a regular member of our expert group and his critical research always attracts keen interest and attention. We highly appreciate his tireless and constant contributions.”

-- KK Philip Kang, Sustainable Urban Development Section, United Nations ESCAP
